

Model R400-10 Rack Assembly

FEATURES

- * Rugged Construction
- * Dual Redundant Power Supplies
- * 19" Rack Mountable
- * Light weight
- * Corrosion Resistant
- * Meets CALTRANS specifications

Description

The GDI R400-10 is a 10-position rack for 400 Series Modems. The GDI R400-10 has slots for 10 plug-in modems that are designed to plug into 170 controllers. Dual redundant power supplies are provided in the unit. If one power supply should fail, the other power supply will take over without interruption. Front panel indicators show that each supply is operating to specifications.

The GDI R400-10 Rack is made from aluminum for corrosion resistance and weight. The front and back panels are hinged to allow access to the internal wiring for troubleshooting. The R400-10 is designed to fit into a standard 19" rack and uses 7" of vertical space.

Specifications

Electrical Specifications

Operating Voltage: 115 VAC
Power Consumption: 50 W

Mechanical Specifications

Construction: Pre-Plated Steel
